I have taken on a new role as Director of Admissions, Diversity, & Social Responsibility at [Topeka Collegiate School](#). Topeka's only independent school. I am a parent of a Topeka Collegiate child, and I am a product of an independent school education. I am extremely excited to return to my roots and to share this with my child.

There are so many highlights from my time at CEP. I thoroughly enjoyed my time at the State Capitol and working on our policy outreach and education. WEALTH Day is such a great event to highlight Statewide efforts. I was lucky enough to lead our first-ever virtual WEALTH Days, however, I look forward to this event being back at the Capitol. The work we environmental advocates do is not easy. It is such a recharge to be surrounded by several organizations and hundreds of people equally passionate about improving our environment. At CEP, we collaborate with such spectacular people, groups, and organizations. I will deeply miss regularly interacting with this community. I will continue my environmental advocacy through my work with the Climate Reality Project and as a board member on Topeka's Sustainability Advisory Board.
